

My name is Treg Holman, and I want to volunteer for a position with the OPPOA ACC because I understand NC construction requirements, have a keen eye for details, and have a non-biased approach to decision making.

I am originally from western NC and resided in multiple cities and rural areas all over this great state. My wife and I relocated to the Hampstead area seven years ago and moved to into our Old Point home four years ago. I have an extensive background in residential construction from masonry foundations, outdoor patios, complete interior home remodels to include bathrooms and kitchens. Growing up in NC and dealing with the random severe weather, I quickly realized the importance of having quality construction and proper drainage on your property.

There are a lot of new families moving to our community that may not be familiar with the potential severe weather that eastern NC must deal with and what exactly that weather can do to their property or their neighbors. If selected my experience will offer clarification or at least better communication dealing with modifications to a new or existing property within the community.

Thank you for your time and consideration.
